Task Performed in this week :

We have gone through the resource (<http://www.2017.ieeeicip.org/Vipcup.html>) provided by Mehul sir and the problem we encountered is that the competition page is no longer valid and we are not able to download the data from there. Since it is an IEEE competition then from there we downloaded the data[1] of 4.6 GB of cropped data in zip format.

Outcomes :

We are able to acquire the data.

Tasks to be performed next :

Next week we will understand and process the data so that we can give data input to the model in the right format.
